

Tessellation Quiz

Name: _____ KEY _____

Date: _____

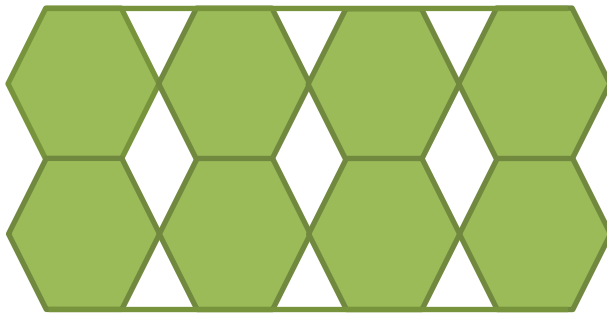

1. What is a tessellation?

A tessellation is the repetition of geometric shapes side by side but do not overlap.

2. Name two geometric shapes.

Two geometric shapes are squares and triangles (other geometric shapes will be accepted).

3. Draw a tessellation incorporating two or more geometric shapes.

4. Identify two tessellations in the room you are currently in.

Two tessellations in the room I am currently in are my green jacket which contains squares and rectangles. The floor is made up of square tiles. (Answers will vary for this question).
